

COMPOSTABLE

Put top half (with glue strip) in trash bin.

Tear to open & put this bag in compost bin.

**1 Trillion
PLASTIC
BAGS**

learn more

Worldwide, people use a mind-boggling one trillion plastic bags per year.

COMMERCIALY

Every product ships from the factory to the warehouse and from the warehouse to your home wrapped in plastic. Once thrown away traditional plastic bags, rejected by recycling, are at best buried in landfills. At worst, plastic packaging escapes into the environment, slowly breaking down into smaller and smaller pieces known as *microplastics*. Pieces of plastic packaging are found in the stomachs of the largest marine mammals and in the cells of the tiniest sea creatures.

That is why we made this 100% non-toxic compostable shipping bag. Certified compostable packaging is guaranteed to biodegrade or compost into non-toxic soil. Compostable packaging films are designed to compost in 90 days or less when processed with other biobased materials like food scraps and yard waste.

Scan the QR code above or use the following URL to access links and guidelines for how to successfully compost this bag: <http://www.geospherepackaging.com/1trillionplasticbags>
